

RescueNet360 Website – Final Pre-Launch Review

This document consolidates persona-based feedback and a structured QA checklist to validate launch readiness for rescuenet360.com.

Persona-Based Feedback

1) Pet Families (Lost Pet – High Emotion / High Urgency)

What they are thinking: "My pet is missing. Tell me what to do in the next 5 minutes."

What the site must do:

- Provide a clear emergency-focused CTA above the fold
- Reduce cognitive load
- Provide reassurance about privacy and safety
- Clearly explain what happens after uploading a pet

Potential Friction:

- Too much ecosystem language before practical steps
- "Request Info" feeling like a sales funnel instead of help

Recommended Enhancements:

- Add a "Lost pet right now?" section on Home + Families page:
 - Upload photo / Create Pet Identity
 - Mark as Lost
 - Network notified
 - Verified reunification
 - Add immediate value guidance even pre-launch
-

2) Shelter / Rescue Leadership

What they are thinking: "Will this increase workload? Does it integrate? Is it secure?"

What the site must do:

- Lead with operational outcomes:
- Fewer calls
- Faster owner matches
- Reduced unnecessary intake

- Clear transfer accountability
- Show time-to-value
- Show role-based permissions

Potential Friction:

- Too visionary without workflow detail
- Unclear coexistence with existing shelter software

Recommended Enhancements:

- Add "Works alongside your current system" section:
 - Not a replacement
 - Cross-org coordination layer
 - Exportable reporting
 - Add workflow graphic centered on:
 - Persistent Pet Identity
 - Custody changes
 - Ownership vs Custody distinction
-

3) Foster / Transport / Volunteer Coordinators

What they are thinking: "Plans change constantly. Show me you understand that."

What the site must do:

- Highlight multi-stop transport handling
- Safety prioritization logic
- Backup plan visibility
- Clear assignment tracking

Recommended Enhancements:

- Add "Coordination that survives chaos" section
 - Multi-leg routing
 - Priority overrides
 - Audit trail
-

4) Veterinary / Clinic Partners

What they are thinking: "Do I get clean records and custody clarity?"

What the site must do:

- Emphasize identity clarity

- Custody + consent clarity
- Reduction of duplicate intake

Recommended Enhancements:

- Add short "For Clinics" subsection signaling future integration readiness
-

5) Sponsors / Community Partners

What they are thinking: "What impact do I actually get?"

What the site must do:

- Clarify sponsor value exchange
- Define measurable impact
- Emphasize mission alignment

Recommended Enhancements:

- Define 3 reportable metrics:
 - Matches attempted
 - Reunifications assisted
 - Transfers coordinated
-

6) Government / Emergency Management

What they are thinking: "Can this scale during disaster? Is it auditable?"

What the site must do:

- Signal disaster readiness
 - Emphasize audit trail
 - Clarify data control boundaries
-

7) Investors / Press / Curious Builders

What they are thinking: "Is this real? Who's behind it?"

What the site must do:

- Clear mission statement
- Why now
- Founding team clarity

- Clean CTA path
-

Launch QA Checklist

A) Navigation + Routing

- Header links function
- Footer legal links function
- No 404 errors
- Direct URL load works
- Back button works properly

B) Request Info Form

- Required field validation works
- Email validation works
- Success state clear and informative
- Failure state visible and helpful
- Submission reaches inbox/CRM
- SPF/DKIM/DMARC verified
- Analytics events fire:
 - request_info_submit
 - request_info_success
 - request_info_error

C) Content Clarity Test

Ask 3 neutral testers: - What does RescueNet360 do? - Who is it for? - What should I do next?

D) Mobile Testing

- Hero readable
- CTA visible
- Accordions functional
- Tap targets appropriate
- Sticky header not blocking content

E) Accessibility

- Keyboard navigation works
- Visible focus states
- Proper heading structure
- Adequate color contrast
- Meaningful alt text

F) Performance + SEO

- Minimal layout shift
- Unique meta titles/descriptions
- OpenGraph tags valid
- No console errors
- Favicon loads

Critical Launch Priority

Ensure the Home page clearly splits into two primary entry doors:

1) Pet Families 2) Shelter/Rescue/Network Representatives

If this is not immediately clear above the fold, conversion risk is high.

This document should be used as a formal launch sign-off checklist prior to production deployment.
