

NOW ACCEPTING PILOT PARTNERS

Animal Welfare Has Always Had Passion. Now It Has Infrastructure.

RescueNet360 connects lost pets, finders, owners, shelters, and rescues to improve outcomes for animals. One network. One persistent identity. Every stage of the journey.

WHO ARE YOU HERE FOR?

Shelters & Rescues

Your team is doing critical work with tools that were never designed to work together. There is a better way.

[Explore shelter tools →](#)

Pet Owners

Your pet's information should not live only in your head. Register, protect, reunite.

PLATFORM OVERVIEW

One Network. Every Animal. Every Organization.

RescueNet360 gives every animal one persistent identity and a clearer information trail. Photos, records, reports, notes, and status updates all stay connected to the animal's identity as they move through the system.

This helps teams spend less time rebuilding context and more time making the next right decision.

PILOT PROGRAM

Founding Pilot Partners Are Now Being Selected

RescueNet360 is selecting a small group of shelters and rescues to test real workflows, give honest feedback, and help shape the platform before broader launch. This is early access with a real seat at the table.

OUR MISSION

Animals Start Over at Every Facility They Enter

A found pet report, shelter intake record, foster note, medical update, or rescue request should not sit isolated in separate systems. RescueNet360 helps the right people see the right information sooner, so more animals have a better chance at getting home, getting placed, or getting help.

Connecting the people, data, and decisions that protect animals.
