

SHELTERS & RESCUES

# Animal Welfare Is Hard Enough. Your Tools Should Make the Work Easier.

RescueNet360 connects animal records, intake workflows, reunification, foster coordination, and rescue visibility through one regional network. You only share what you choose to share. RescueNet360 adds the coordination layer around the tools you already use.

Apply for Pilot Access

THE PROBLEM

## You Already Know the Pressure.

Shelters and rescues work inside a system that asks too much from too few people. Records live in different places. The people care. The problem is coordination.

 Animal history gets harder to follow every time a pet moves

 Staff spend time chasing records instead of moving work forward

 Lost and found matches rely too much on manual searching

 Rescue teams miss animals they might have helped

THE SOLUTION

## One Connected Network

 Intake and animal tracking

 Persistent pet identity

 Lost/found and reunification

 Foster placement tools

 Transport workflow

 Public profiles and apps

 Reporting and analytics

 Contacts, tasks, and docs

PILOT PROGRAM

## Shape the Standard. Help Build the Network Animal Welfare Has Always Needed.

We are inviting a small group of shelters and rescues to test real workflows, tell us what fits, and help prioritize the next build decisions. No cost. No obligation beyond honest feedback.

Early platform access

Direct input into features

Founding Partner recognition

Also includes priority onboarding support and a practical way to help shape regional animal welfare infrastructure.

## Ready to Join the Pilot?

Tell us about your organization and your biggest coordination challenge. We will review your request and follow up.

What does your current workflow look like?

Apply for Pilot Access

No cost to participate. Rescues receive free access. RescueNet360's funding model is built on sponsorships, not shelter budgets.
